Good Morning Nancy,

Thanks again for all your help yesterday!  I have one more, what I hope will be quick, question for you:

Are there any specifications around what is classified as Tamper Evident?

For example, we are recommending 3.5mm and 5mm aluminum cables that are 12" in length; they are ISO 17712 compliant and classified as Tamper Evident.  I've included the link to the ISO if you'd like to take a look at it. http://www.ismasecurity.com/ISO-17712

Thank you and I look forward to seeing your labeling ppt and of course being on the call with you tomorrow – I get to run the show this time instead of Kent!  Yikes!

Description: Description: Description: aginfo
